

# Aleandro F1

Early maturing

HR: ToMV; Vd; Fol 1  
IR: TYLCV; Ma, Mi, Mj

20 g

Fresh market tomato variety, red cherry type. With a distinctive shape and grace, its clusters are composed of compact and meaty fruits which weight is 20 gr. (0,04 pounds). Ripening is reached when fruits turn into shiny red. They have also an excellent shelf life (LSL) and high resistance against cracking. Aleandro F1 is a true cherry in terms of shape, size and colour, and provides customers with a strong and penetrating taste typical of Mediterranean tradition. The plant is rustic with medium stamina and short internodes. It takes well roots on summer.
