

Eolo F1

Middle-earling maturing

HR: ToMV; Vd; FoI 0, FoI 1.
IR: TYLCV; TSWV; Ma, Mi, Mj

130 g

Indeterminate tomato variety, red cluster harvesting. Shiny red, the fruit weights around 130 gr. (0,26 pounds) and it has long shelf life. Elegant clusters with herringbone shape even in the upper parts. Their stems preserve a deep green colour in shelf life. Plant with medium stamina, breezy and covering, it has short internodes which are regular even in the upper parts. Very rustic, it adapts well to autumn transplants and long cycles and it is very resistant to low temperatures of winter in cold greenhouse.
