

Giovì F1

Square type

Middle-earling maturing

HR: TMV; PVY
IR: TSWV

15x11cm

Pepper variety for greenhouse, tunnel and open field cultivation. Ideal for areas affected by TSWV and PVY virosis. $\frac{3}{4}$ quadrilobated, smooth and homogeneous surface, very thick flesh, typical bright and shiny yellow, particularly long leaf stalk. Giovì F1 pepper is characterized also by a thick width and high shelf life (LSL). The plant is rustic and productive even in the upper branches. It has regular internodes.
