

Tecla F1

Early maturing

IR: Gc/Px

160-240 g

18-22 cm

Variety of dark squash. It has a very elegant fruit, cylindrical and dark green shiny. It has a large stalk that facilitates the collection, and a small scar draw. It is characterized by a Long Shelf Life of fruit in post-harvest. The plant has a medium vigor, upright habit and short internodes. It tolerates transplants in early autumn and spring.
